

COMPARTE

meet the artisans—

COMPARTE (Comercializadora de Productos Artesanales Exportables) is a private, non-profit organization that exports Chilean handicrafts around the world. As members of the WFTO, Comparte's mission is to improve the standard of living for owners and employees of Chilean handicraft workshops, by promoting and exporting various handmade products of the highest quality, while supporting these same artisans through technical and product development assistance programs. Purchasing COMPARTE products helps improve the living conditions of their artisans and craftsmen by paying fair prices and stimulating justice in the workplace of the developing world.

The artisans often work from their homes. In some cases adult children work alongside their parents while younger children attend school.

Comparte products include enameled copper earrings; fused glass earrings pendants and bracelets; sterling silver earrings; wood articulated pens, fish, snakes and dinosaurs; fused glass plates and ceramic ocarinas.
